Off Easily as is Custom.

(By Associated Press.)

WASHINGTON, D. C., April 22.—Secretary Moody is inclined to believe that the prosecution of the naval officers at San Juan, P. R., who are charged with sumgelling, is rapidly becoming persecution, and it is intimated at the department that unless the attitude of the local officials here changes the desirability of San Juan as an important naval station may be abandoned.

It is understood that the naval officers there may be withdrawn. The charges against these officers were investigated and in accordance, with the practice at the Navy Department, the offenders paid double the duties to which the goods brought in were subjected.

Governor Hunt fully appreciates the attitude of the government and is doing what he can to straighten out matters and relieve the officers or further embarrassment.

Mr. Bryan. Bryan and Hanna—how is that for a ticket?"

NO ARC MENT.

"Of course I am aware that all this is not argument, but then there was little argument in Mr. Hanna's speech. He takes up a paper which has met the endorsement of 38 per cent. of the manufacturers of the country as being a fair expression of the socialistic tendency and what Carroll D. Wright calls "the damnable practices of trades unionism and makes what I think the country will hold as a poor attempt to answer it. "What has Mr. Hanna to say about fixing wages by artificial methods? There is the woot of the whole matter. If it is right that one class of workmen should have their wages fixed arbitrarily, then it is only just that the wages of all classes should be fixed in the same manner. Does Mr. Hanna agree that it was perfectly proper for the miners' union to demand a scale of wages out of proportion to the wages paid similar labor in other industries and failing to get it to go on sirike?

"I am surprised to see that Mr. Hanna so flatily denies the proposition that organized labor is founded on the principle of force, when every day furnishes demonstrations in proof of my charge. The only reason why the anthractic miners received a wage scale confessedly out of proportion to what similar labor gets elsewhere is because they were able to compel its granting by force. Mr. Hanna raises the joint agreement entered into between the bituminous miners and operators. He says that peace has been maintained by virtue of those agreements for five years in the bituminous industry. The wages of these miners have been increased 41 per cent. by these agreements. The mien-owner charges the payment of these wages to the consumer? One joint agreement is but the procusor of another and there is no limitation to the increase to the wages under this system.
